

BARRON'S 500: BEST-PERFORMING COMPANIES

Recognizing Management Performance

Barron's scores the 500 largest stocks by market capitalization on how well they have delivered a return to investors. Barron's combs these 500 names to find undervalued shares. We grade the firms on three metrics: median three-year cash-flow-based return on investment; the one-year change in that measure, relative to the three-year median; and adjusted sales growth in the latest fiscal year. The result is a stock-pickers holiday for value investors.
